ROOM ENVIRONMENT SENSORS (ES)

Pace™ seamlessly integrates room thermostats, relative humidity sensors, and CO2 sensors to monitor room environment information. Room information and setpoints are reported to Pace™ using analog and/or thermistor signals. Room setpoints can be adjusted at the room level or over the building automation system.

Room Temperature Sensor

Room Temperature Sensor with Display

Room Temperature Sensor with Display and Pushbutton Setpoint Adjustment

Room Temperature and Relative Humidity Sensor

Room Temperature Sensor with Display and Relative Humidity Sensor

Room Temperature Sensor with Display, Pushbutton Setpoint Adjustment and Relative Humidity Sensor

Room Temperature Sensor with Relative Humidity Sensor and Carbon Dioxide Sensor

Room Temperature Sensor with Display, Relative Humidity Sensor and Carbon Dioxide Sensor
ACCESSORIES & OPTIONS
For Room Control

DOOR CONTACT SWITCHES (DCS)

Door contact switches allow for door position monitoring and Pace™ control optimization. Local, remote or building automated system alarms can be setup to alert building staff of door status.

Flush Mount

Surface Mount
DUCT ENVIRONMENT SENSORS (ES)

Duct sensors are available to report duct temperature and relative humidity information. Duct information is reported to Pace™ using analog and/or thermistor signals.

Duct Temperature with Relative Humidity Sensor

Duct Temperature Sensor

BACNET MS/TP TO IP ROUTER (RTR)

The BACnet MS/TP to IP router enables the transmission of information between Pace™ BACnet MS/TP network and a third party BACnet IP building automation system.

IP Router

SENSOR INFORMATION NETWORK

Room Pressure Sensor (SRPS)

Room pressure measurement through an industry-first maintenance-free Room Pressure Sensor (SRPS). The SRPS is highly accurate with minimal drift over time. When tested against competing technologies, including diaphragm sensors and thermal anemometers, the SRPS has proven to be the most durable pressure sensing technology. The SRPS integrates with Pace™ through the Sensor Information Network.
Pressure Transducer (PTX)

Utilizing technology similar to the Room Pressure Sensor (SRPS), the PTX is a highly accurate remote pressure transducer. The PTX allows for pressure measurement up to 2 in.w.c (500 pa) independent of the Pace™ pressure transducer allowing for duct pressure or airflow device flow reporting.

POWER TRANSFORMERS (VPT)

Transformers and transformer power banks are available from Antec Controls with varying VA options.
